## Education at Munich's all girls schools (*Mädchengymnasien*)

In its commitment to educational equality, the City of Munich is particularly committed to the implementation of gender-equitable education. All municipal, state, church and private all girls academic schools in Munich pursue the goal of drawing out and nurturing the potential of young women and preparing them for active participation in society.

Why attending an all girls' school can be a particularly beneficial path for your daughter:

- Self-assertion often remains a particular challenge for young women. All girls schools specifically support and promote a positive self-image of their students.
- Modern pedagogical concepts of mono-education allow the didactic and methodological setting of the school to be specifically geared toward acquisition of skills among girls.
- Girls discover the fascination of science more easily among themselves, as they participate more actively in lessons.

Further information is available at the information evenings of the individual schools. You will find the all girls Gymnasien in Munich in the following places in this brochure:

■ Municipal Schulartunabhängige Orientierungsstufe Munich-Neuperlach

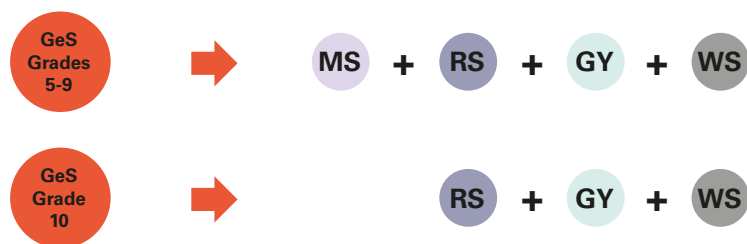

## Municipal Schulartunabhängige Orientierungsstufe Munich-Neuperlach

The municipal orientation level independent of school type (*Schulartunabhängige Orientierungsstufe*) takes place in grades 5 and 6. Students are prepared for the transition to grade 7 at a secondary school. Which secondary school to attend is decided at the end of Grade 6. Further information on the regulations for transfer to Grade 7 can be found on the school's website.

## Municipal Willy-Brandt-Gesamtschule

At the Willy Brandt Integrated School, students can achieve the secondary school leaving certificate, the intermediate secondary school leaving certificate and the upper secondary school leaving certificate in science and technology

From grades 5 to 7, students attend a common core group (class). When they enter grade 8, the students decide whether they can complete the secondary school leaving certificate, the intermediate secondary school leaving certificate, or whether they choose to achieve the upper secondary school leaving certificate for the science and technology track. In this case, the students attend the 11th grade at the Municipal Willi-Graf-Gymnasium.
